Exam Cheat Sheet

Curious Horizons

Algorithms

Core Theory

Sorting algorithms are fundamental.

Quick Tip

Always consider time complexity (Big O notation) before choosing an algorithm.

Complexity Table

Algorithm	Best Case	Worst Case
QuickSort	$O(n \log n)$	$O(n^2)$
MergeSort	$O(n \log n)$	$O(n \log n)$

Memory Trick

QuickSort is **Q**uick on average, but MergeSort is **M**ore consistent.
